

## Short review on heat recovery from exhaust gas

Submitted by Thierry Lemenand on Wed, 10/04/2017 - 09:10

Titre	Short review on heat recovery from exhaust gas
Type de publication	Article de revue
Auteur	Jaber, Hassan [1], Khaled, Mahmoud [2], Lemenand, Thierry [3], Ramadan, Mohamad [4]
Editeur	AIP Publishing
Type	Article scientifique dans une revue à comité de lecture
Année	2016
Langue	Anglais
Date	2016
Pagination	030045
Volume	1758
Titre de la revue	AIP conference proceedings
ISSN	0094-243X
Résumé en anglais	<p>The increasing growth of energy demand leads to issues associated with energy demand reduction and propose new energy efficient solutions. Heat recovery consists the most promising solution especially in regions where renewable energy resources are not available. That is why the domain of heat recovery has shown a tremendous improvement during the recent years. On the other hand, few works have been dedicated to heat recovery from exhaust gas. This paper presents a review on heat recovery from exhaust gas. The authors propose to classify exhaust gas heat recovery systems within three different classifications that are exhaust gas temperature, utilized equipment and recovery purposes.</p>
